DETAILED ACTION

1. The Amendment filed by Applicant on 06/09/08 has been entered.

Response to Amendment/Arguments

2. Applicant's amendment and arguments filed on 06/09/08 have been fully considered and they are found persuasive.

3. The claim object is withdrawn.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Holy et al., EP 0 552 876 (hereinafter "Holly"). Holly teaches a vinyl-based polymer having a Mw of less than 10,000 and a process for preparing such polymer wherein the

process occurs in a continuous reactor at temperatures, process times and rates of the claimed invention. See Holly, Abstract; page 3, line 38 through page 6, line 13. Holly further teaches post-polymerization or second step whereby an initiator is introduced further polymerizing monomers at temperatures, reaction times and conversion rates within the ranges provided in the claimed invention. See Holly, page 6, line 38 through page 7, line 26. Holly further teaches the use of a broad hosts of monomers to prepare the vinyl based polymer. See Holly, page 4, line 30 through page 5, line 18. The Examiner contends that Holly anticipates the present claims by teaching the vinyl-based polymer and processes of the claimed invention.

6. The present claims are "product by process" and are interpreted as product claims, not process claims. Quoting precedent cases, In re Thorpe states,

If the product in a product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. See In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985).

The Examiner contends that the vinyl-based polymer of the prior art Holly containing a mass average molecular weight having a Mw of less than 10,000 is substantially identical to the claimed

vinyl based polymer with a mass average molecular weight of 1500 to 100,000.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Thu, 10 AM - 8 PM.
